# Rock Salt

# COMMERCIAL SALTS

## Pink Salt

Our pink rock salt is the most widely known Himalayan rock salt. It derives its pink hue from the main trace element iron. It has many more trace minerals like magnesium, potassium and calcium. All in all pink rock salt has 84 of the 92 minerals needed by the human body. It adds a great umami flavour to any dish and it is highly praised and used for this taste quality.

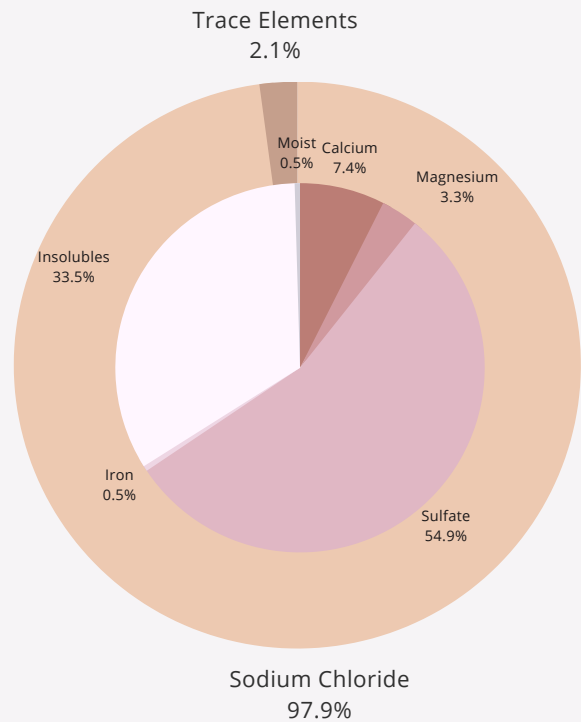

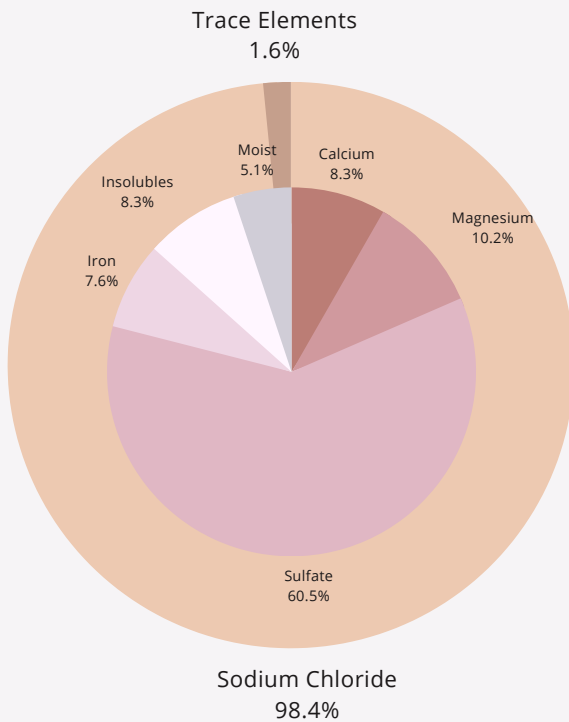

Made from our organic pink rock salt is a special authentic product called black rock salt. Made with a authentic process to produce a rich flavour. As well as adding more health benefits for consumers.

## White Salt

Just like our pink rock salt, the white variant is the purest form of rock salt. It contains less iron but all of the trace elements as with pink rock salt. White rock salt is far rarer making it a prized salt for consumption in Asia combined with its pure salt taste.

Therefore white rock salt also has far fewer impurities than pink rock salt. So it is the purest rock salt and therefore the purest salt you can find in the world. A excellent product for people who just want a organic salt without any pollutants. And is commonly used for people with high blood pressure replacing table salt

# Edible Organic Rock Salt

## Benefits

Rock salt offers a wide range of health benefits in each segment. Our table rock salt can be used as regular salt in both traditional and commercial kitchens. Giving any meal a healthy addition with a wide range of trace minerals. Due to the fact the Rock Salt is mined inside a mountain range, it has never been polluted by the global industrial revolution. It is manually handled and mined to prevent any pollution from occurring.

For sales to consumers in stores Bizz Trading can a wide range of default pre-packaged solutions in the form of jars, bottles and crushers. In 75 gr / 150 gr / 250 gr / 500 gr measurements. For larger commercial needs Bizz Trading offers the default packaging solution in the form of bags in 1kg / 5 kg / 10 kg / 25 kg. For custom solutions please contact Bizz Trading directly.

# INDUSTRIAL SALTS

## Rock Salt Products

Our industrial salts come in the offering of bulk deliveries to be used in food processing or other industrial applications for salt. Both in the coarse and fine grind variants to match the industrial application. By default the white rock salt is on offer but Bizz Trading can also offer the pink rock salt.

- Organic white rock salt: 99.4%
- Organic white rock salt: 97.9%
- Organic pink rock salt: 98.4%

Requiring little to no refining making it a very cost effective resource for any industrial user of salt. Pink rock salt can be used for Asian cuisine for instance or a elegant finisher for its elegant pink hue.

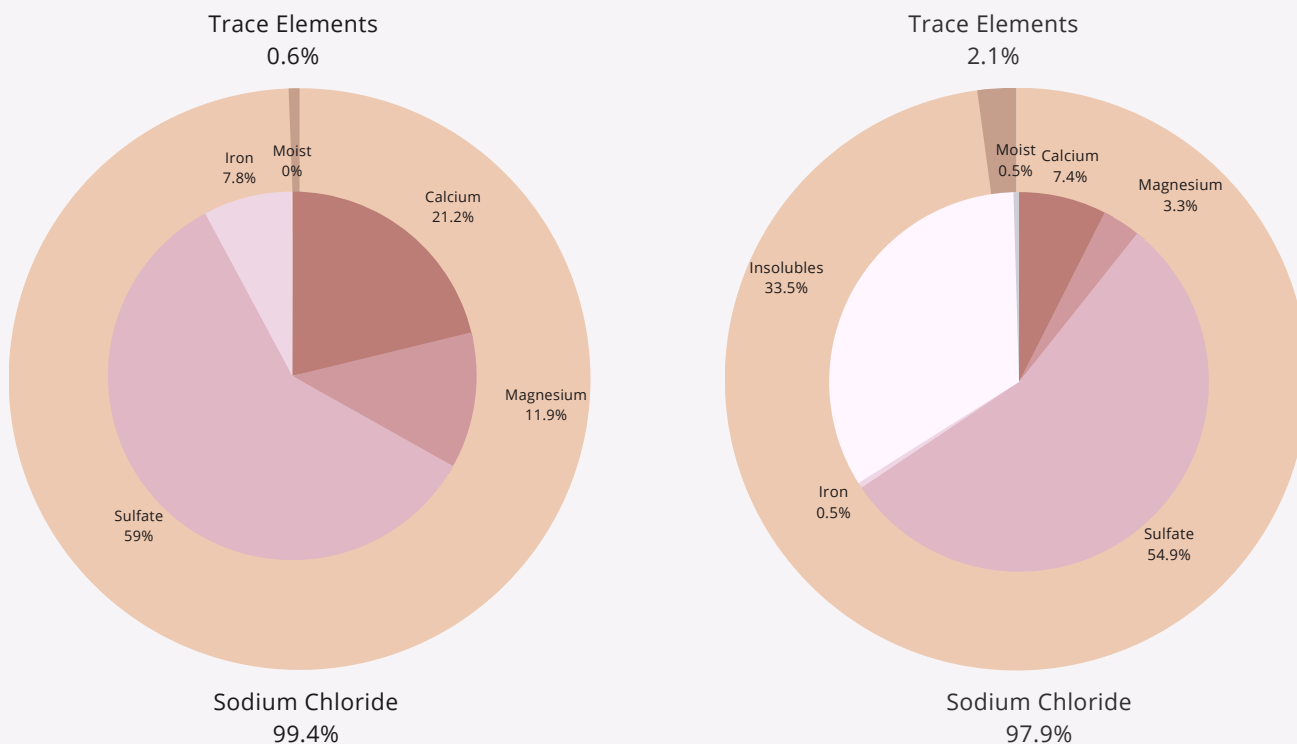

## Why Rock Salt?

Since rock salt is the purest salt in the world. Making it a excellent raw material for industrial users. When desired Bizz Trading is able to provide lab reports and samples for testing purposes by the client

From the regular application in food processing like any other salt. It can also be used in cleaning products, animal feed, raw food processing, clothing dyes, chemical processes etc.

Normally industrial salt is below the regular 99% purity from table salt. With our organic white rock salt product, this is not the case. It is the purest salt on the market.

# Specifications Industrial Organic Rock Salt

## Packaging

We can offer a wide range of packaging and shipping solutions. That the client may specify entirely too their wishes. Bizz Trading by default is shipping within a 20 ft container using a wide range of bags stacked on top of pallets of the following specification.

- 1 kg / 5 kg / 10kg / 25 kg.

If the client so desires Bizz Trading can offer custom labelling and packaging. Offering excellent payment terms the entire process will be smoothly and professionally handled by the experts of Bizz Trading. Please refer to our shipping specifications at the bottom of this catalogue.

# ANIMAL LICK SALTS

## Animal Lick Salt

Our product line of animal lick salt aids farmers with their livestock. By providing an essential range of trace minerals and sodium.

Livestock has a potassium-rich diet by consuming a high quantity of forage. This in turn affects the Livestock sodium levels in livestock. Offering lick salt to the livestock increases the sodium to healthy levels. And that in turn increases the absorption in the rumen of vital nutrients. Livestock will also stop drinking their urine to compensate for low sodium levels. And it will help to prevent grass tetany.

## Health Benefits

Having healthy levels of sodium in livestock is vital for several reasons.

- Digestion
- Growth
- Fertility
- Milk Production
- General Health

NaCl(rock salt) aids in many bodily functions. From regulating the body temperature to nerve functions. And the absorption in intestinal fluids of amino acids and minerals, digestion of proteins. AFA compressed and natural lick stones contain 11 essential minerals for livestock

## Key Takeaways.

Based on medical research using salt in general as an additive, cattle will be healthier in general. Add to that the benefits or even more minerals from organic rock salt the farmers stand to gain and their animals. Research has shown salt can help prevent grass tetany in foraging cattle. It also helps to prevent methane from building up in foraging cattle and causing pain by inflating the intestines inside cattle. This requires the care of a veterinarian. This paired with the imposed methane reduction in the fight against climate change will put the farmer in a far better position.

But in terms of the overall production for farmers, a healthy diet of animal lick salts will aid in for instance milk production in cows. Up to a 5,15% increase translates into roughly 2kg of milk per day per cow extra. As well as helping horses who undergo training every day to maintain their stamina meeting the required salt intake.

---

## Farmers Benefits.

Farmers will enjoy an increase in the overall production of milk in dairy livestock. By having generally healthier livestock thus fewer medical bills. Lower death rates in livestock herds. By digesting feed better the animals will reach other nutritional values better. This ties into health and the production of milk or growth in livestock for meat products. Rock Animal Lick Salt is easy to store and handle. Both the organic and AFA compressed lick salt variants do not allow livestock to bite off pieces.

This in turn gives farmers far fewer costs in maintaining their livestock and increases the farmer's profits. By default, Bizz Trading can offer lick salt in the following sizes: 2 kg / 3 kg / 5 kg / 10 kg for both the natural and compressed stones.

# Notes

We evaluated the effects of mineral salt supplement on enteric methane emissions, ruminal fermentation and methanogen community of dairy cows over a whole lactation period. Ten Holstein cows fed a total mixed ration (TMR) diet were randomly allocated into two groups, one supplied with mineral salts as the treatment group and the other as the control group. The methane measurement showed that the ingestion of mineral salts lowered enteric methane emissions significantly ( $P < 0.05$ ), with an average of 10.5% reduction over the whole lactation period. Ruminal fermentation analysis showed the mineral salt intake could significantly decrease the acetate : propionate ratio ( $P < 0.05$ ). Real-time PCR assay showed that rumen methanogen abundance significantly reduced in the treatment group ( $P < 0.05$ ) but was not significantly influenced by mineral salt intake over the whole lactation period. Intergroup methanogen community composition was influenced slightly by mineral salt intake; however, significantly different intragroup profiles were apparent throughout the whole lactation period, according to denaturing gradient gel electrophoresis analysis. In conclusion, these results suggested that the effective mitigation of enteric methane emissions by mineral salt intake could be attributed to decreased density of methanogenic archaea and that fluctuations in methane emission over the lactation period might be related to *Methanobrevibacter* diversity.

# Medical Salt

# MEDICAL SALT

---

## Unparalleled Product

Medical rock salt is of the highest quality. A particular deposit with unrivalled purity is used only for medical applications.

The salt form of medical rock salt is Halite forming isometric crystals. And this in turn is essential to determine its application in APIs (Active Pharmaceutical Ingredients).

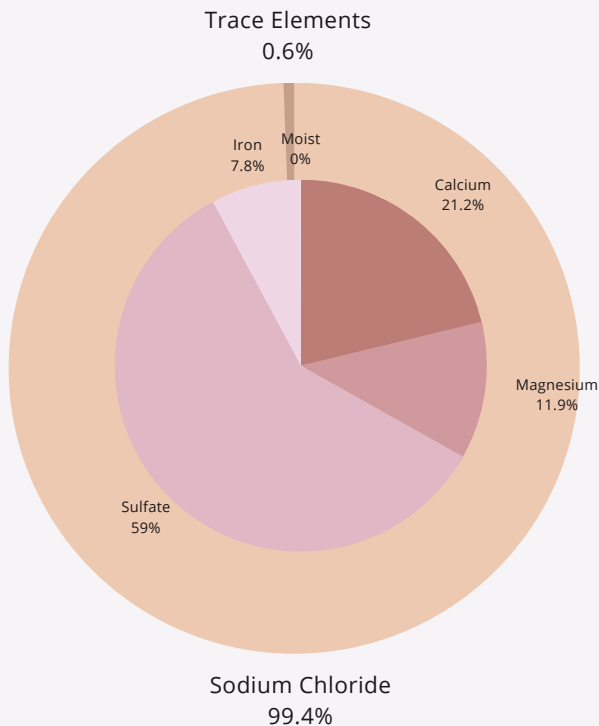

Medical rock salt has a crystal structure labelled cF8 in the Pearson Scale. For the counterion for solubility and properties in drug development.

## Medical Applications

Approximately 50% of all US FDA approvals contain pharmaceutical salts. The right salt selection is vital for any drug development. It could aid development as well as hinder it. Depending on the salt form selected.

Many drugs are available in salt forms these are mainly economically coupled with regulations considerations. Reformulating drugs into a salt form can also extend the patent beyond its initial time period. Or simply help the patent holder to market via licensing to generic manufacturing before the patent ends.

## Composition

## White Rock Salt

Being organic salt and there for purest rock salt in the world. Only available for chemical or pharmaceutical industry clients. With a purity of 99.4% NaCl and only 0.6% of trace elements and non-solubles. The white rock salt on offer is exceptionally suited as medical salt. That said Bizz Trading is aware of the high demands the medical industry places on its raw materials. And is therefore willing to provide samples for testing and its own lab reports to prospecting clients.

## Every step of the way

When the conclusion is made the white rock salt from Bizz Trading is the best suited for the development of a pharmaceutical. Bizz Trading stands ready to provide this excellent raw material. That is so vital for the cost-effective and successful development of any drug. And will ensure the entire process is smoothly handled from packaging to shipping. Each step will be delicately handled to ensure the organic rock salt safely arrives at its destination. With full insight and input from the client if so desired. For questions or more information please e-mail at [info@bizztrading.com](mailto:info@bizztrading.com) or call **+31 85 0477700**.

# Rice

# BASMATI RICE

---

## Origin.

Basmati rice is renowned for its savoury taste and texture. We at Bizz Trading can offer this flavour and quality from our reputable suppliers in Asia.

Basmati rice has a wide range of benefits making it a vital part of the Asian diet. For instance, being low on sodium and cholesterol makes Basmati an ideal food for a healthy life. Furth more, Basmati rice is full of essential amino acids and folic acids. Combined with excellent cooking properties and a soft and fluffy texture and savoury taste makes this rice a delight to consume.

## Quality.

Bizz Trading can offer 4 grades of Basmati using the two usual processing and milling methods, Steam and Sella. And then proceed to prepare the rice for delivery and consumption.

In addition, the physical standards for milling can also be set by the client best suited for their end products. may it be store shelves or industrial applications.

Specifications that the client may set when placing an order are moisture content, paddy grain, green grain, and shrivelled.

## Basmati Rice Grades

Grade	Process	Notes
1121	Steam/Sella	Physical standards set by client.
1509	Steam/Sella	Physical standards set by client.
386	Steam/Sella	Physical standards set by client.
Broken	Steam/Sella	Physical standards set by client.

### Packaging.

Our prices are competitive and our product quality is of the highest standard. We can provide samples at the customer's request for taste testing and inspection. The client may further stipulate the packaging solution. Bizz Trading can with the client customize the entire process, labels and packaging or can offer the following standard packing solutions.

- Material: Plastic Bags, Jute Bags, Gunny Bags, Cotton Bags.
- Sizes: 1kg, 2kg, 5kg, 10kg, 25kg.

To protect the rice from the elements standard shipping will be done using 20ft containers. Unless requested otherwise by the client.

# WHITE RICE

---

## Origin.

White rice is a timeless classic when it comes to rice products. Here Bizz Trading can make several offerings in terms of variants with superior quality. Rich in amino acids and low in cholesterol. With excellent cooking properties and natural flavour.

Supri is the best quality white rice grown on only the best paddy's. Irri rice is a classic long grain white rice. Pukhranj rice is a hybrid rice to increase yield for farmers. 100% broken rice is a economic solutions where rice is used to make flour or industrial fructose. Ensuring Bizz Trading has solid offerings in all price segments.

## Quality.

All white rice variants can be supplied from either the Steam or Sella processing methods.

Then comes the milling process here the client may specify their own specifications. To ensure the final product on delivery is ready for the production process or consumption.

Specifications that the client may set when placing an order are moisture content, paddy grain, green grain, and shrivelled.

## White Rice Variants.

Grade	Process	Notes
Supri	Steam/Sella	Physical standards set by client.
Pukhraj	Steam/Sella	Physical standards set by client.
Irri	Steam/Sella	Physical standards set by client.
Broken	Steam/Sella	Physical standards set by client.

## Packaging.

Our prices are competitive and our product quality is of the highest standard. We can provide samples at the customer's request for taste testing and inspection. The client may further stipulate the packaging solution. Bizz Trading can with the client customize the entire process, labels and packaging or can offer the following standard packing solutions.

- Material: Plastic Bags, Jute Bags, Gunny Bags, Cotton Bags.
- Sizes: 1kg, 2kg, 5kg, 10kg, 25kg.

To protect the rice from the elements standard shipping will be done using 20ft containers. Unless requested otherwise by the client.

# Beans

# SOYA BEANS

---

## **Diverse and Healthy**

The venerable soya bean has much to offer when it comes to food. But it is so much more than just a portion of healthy food for humans. Animals can benefit from the soya bean nutrients as well. While remaining relatively cheap to produce.

Most people know soya beans as healthy vegetables and products like soy milk, tofu, and soy sauce. But human consumption only has remained a small portion of the annual consumption of soya beans.

## **So Many Use Cases**

Having so many applications for soya beans Bizz Trading secured reliable suppliers to provide the food crop to its clients. Being rich in plant-based protein, oil, fibres, and a range of minerals and vitamins.

Soya beans are widely used for humans but even more for animal food. Roughly 70% of the annual production is used for animal feed, edible oil, and industrial applications. The fact, soya beans are full of vital nutrients like amino acids and protein. It greatly aids livestock in production and health.

## Variants

While there are a wide range of different soya beans variants. Bizz Trading picked the two most common variants.

## Soya Beans

Soya beans also known as yellow soya beans are the most common variants and are widely used for industries as well as food production and animal feed.

## Green Soya Beans

Edamame as green soya beans are referred to are a younger variants of the soya beans. Mostly for human consumption

---

## Where to?

With a rich selection of nutrients for both human and animal alike. The only questions remains where is the next shipment going to? Bizz Trading can provide both GMO and non-GMO variants for both soya beans and green soya beans.

A wide range of shipping, labelling and packaging solutions that Bizz Trading can provide to any clients. The entire process can be arranged or with greater input from the client when it comes to custom packaging and labelling. But more details and information please don't hesitate to contact Bizz Trading.

# KIDNEY BEANS

---

## Variety

The four main variants of the ever so popular kidney beans. Part of most cuisine throughout the world kidney beans remains a popular food. Being low on fat and sugars kidney beans are part of many local cuisines due to their health properties.

Being used on every continent on many local signature dishes. Having a range of desirable textures and flavours the kidney beans add a much-desired taste and bite to any dish. Bizz Trading made this great variety available to its clients through curated suppliers.

## Very Nutritious

One of the most popular vegetables in the world is adding a wide range of nutrients to the human diet. Full of plant-based protein and fibers as well as a wide range of vitamins and minerals. But kidney beans also have amino acids vital for the human body.

Every variant of kidney beans is packed with vitamin B9 in different percentages. But also depending on the variants will have a range of minerals like manganese, copper, and potassium. Ever so popular when mixed in a healthy salad or burrito because of the rich nutrients.

## Red Kidney Beans

Soft texture and neutral taste making is commonly used throughout the world. From chili con carne to taco's.

## White Kidney Beans

With a tender texture and a nutty earthy flavour popular in Mediterranean and American cuisine.

## Black Kidney Beans

A mil sweet flavour with a meaty texture it is commonly used in Tex-Mex or Cajun cuisine.

## Brown Kidney Beans

A slight nutty flavour makes it popular in various local dishes in Asia as well as Europe.

---

## Benefits

Being a vital food source for so many people around the world. Bizz Trading can offer the GMO and non-GMO variants of all kidney beans. As well as being able to offer a wide range of solutions when it comes to packaging and labelling.

The entire process from start to finish can be carefully planned with any client or done so entirely by the team at Bizz Trading. With the client staying informed every step of the way. For more details or information please contact Bizz Trading.

# Edible Oils

# REFINED PALM OIL

## Liquid Gold.

With refined palm oil taking up 33% of the global vegetable oil market. But only using 5% of the total farmland used by vegetable oil producers makes it 10 times more efficient.

Refined palm oil can be used in cooking, personal care, cleaning, biofuel, and health supplements or be fractionated to be used in other products.

Because of this refined palm oil is renowned for its health benefits and is a great addition to any healthy diet. And furthermore is comparably cheap to other healthy vegetable oils.

## Packaging.

We offer a wide range of packaging solutions including custom labelling and packaging.

### Bulk Solutions.

- 200 L Plastic Drums.
- 208 L Metal Drums.
- 20 Mt Flexi Bags for 20 Ft Containers.

### Commercial Solutions.

- 15/18/20/25 L Jerry Can.
- 15/18/20/25 L Tin Can.
- 1/2/5//10 L PET Bottles.

## Palm Oil Specification.

Free Fatty Acid	0.1 Max
Melting Point	24 Celcius
Moisture & Impurities	0.1 Max
Cloud Points	CP 8 & 10
Iodine Value	56 - 60 Min
Colour(5-1/4)Lovibond Cell	Y 30.0, R 3.0 max

Our refined palm oils(RBD) have 50% saturated fat, 40% MUFAs, and 10% PUFAs and have a smoke point of 235 Celsius.

## Superior Products.

Our high-grade palm oil comes from sustainable palm tree plantations. All of our palm oil products are certified and accredited by a wide range of Institutions. To name but a few, our palm oil products are both Halal and Kosher certified. As well as various certifications like ISO 9001:2015. Conforming to a range of government regulations for managing, processing and refining edibles.

Therefore we can ensure that our products will be of the highest quality and suitable for any application as our clients see fit. To name an excellent example here is refined palm oil can be used as a Bio fuel. For more information or simply more details please contact Bizz Trading.

# RED PALM OIL

## **Culinary Delight.**

Red palm oil is a savoury and earthy tasteful cooking oil. Being a nutrient-dense culinary oil with a rich reddish or orangish colour.

Considered to be an organic cooking oil full of vitamins A and E due to the fact it is not refined. Making it an even healthier edible oil yet cheaper than other vegetable oils.

Making red palm oil is a process of steaming the palm fruit so they release the palm oil and then separating it further using a expeller-press. Ensuring all the nutrients of the palm fruit remains inside the red palm oil.

## **Packaging.**

Having the same packing solutions ready as refined palm oil. The red palm oil comes in the following offerings. Including the custom labelling and packaging when requested.

### **Bulk Solutions.**

- 200 L Plastic Drums.
- 208 L Metal Drums.
- 20 Mt Flexi Bags for 20 Ft Containers.

### **Commercial Solutions.**

- 15/18/20/25 L Jerry Can.
- 15/18/20/25 L Tin Can.
- 1/2/5//10 L PET Bottles.

## Red Palm Oil Spec.

Free Fatty Acid	0.2% or less
Melting Point	24 Celcius
Moisture & Impurities	0.5% or less.
Cloud Points	28 ~ 32 Celsius
Iodine Value	50-55 Min
Colour(5-1/4)Lovibond Cell	Y 40, R 6.0 max

Our red palm oils have 50% saturated fat, 37% MUFAs, and 9% PUFAs and have a smoke point of 232 Celsius.

Palm Oil	Carotenes	Vitamin E	Phytosterols
Crude*	643 ppm	869 ppm	210-620 ppm
Red*	513 ppm	707 ppm	325-365 ppm
Refined*	0 ppm	561 ppm	109-170 ppm

source: Characteristics of Red Palm Oil, a Carotene- and Vitamin E-rich Refined Oil for Food Uses

## Savoury Taste.

Having the same certifications, compliance and being an organic product red palm oil is the main reason it is so popular in Asia. Giving that savoury earthy taste it is so famous for in local Asian cuisine.

Bizz Trading stands ready to bring this product to the market and ensured it has access to this edible oil. Ensuring it is of the highest quality working together with the supplier from Malaysia. Red palm oil can also be fractionated into its respective super olein and stearin. And can be used in wider industrial applications. Similar to refined palm oil.

# SUNFLOWER OIL

## **A versatile oil.**

A popular cooking oil because of its many traits. Sunflower oil is used in salads and cold sauces because of its low melting point. But also excellent for frying and sautéing due to its high smoke point.

But it does not end there sunflower oil is also a highly sought-after raw material for industrial use due to its high oleic properties. And more recently sunflower oil is considered a more environmentally friendly solution for mineral oil.

Bizz Trading can supply both crude and refined sunflower oil. They are suitable as a carrier oil, edible oil, and further processing into various oil-based products.

## **Quality.**

Working with leading edible oil refineries Bizz Trading can supply this highly sought-after sunflower oil and provide samples and lab reports if requested. This concerns both refined and crude sunflower oil.

All sunflower oil is environmentally friendly and consistent in quality, colour and specifications. Following GMP and ISO regulations and suitable technologies.

Furthermore, it is also possible to produce cooking oil derived from blends with other edible oils. With specifications provided by the client.

## Sunflower Oil Specifications.

Free Fatty Acid	0.1%
Melting Point	-18 Celcius
Moisture & Impurities	1.5% - 2.0%
Cloud Points	8 ~ 10 Celcius
Iodine Value	120-145 Min
Colour(5-1/4)Lovibond Cell	Y 3.0, R 0.3.

Saturated Fat	8.99%
MUFA's	63.4%
PUFA's	20.7%
Smoke Point	227 Celsius

Data in this table considered a range. Updated reports can be requested by client. Samples may also be requested if so desired by the client.

## Packaging & Shipping.

There are a wide range of packaging solutions available to be suit any type of order. Bizz Trading is also able to offer custom solutions for the packaging. As well as custom labelling and branding if so desired by the client. As well as provide the required papers and shipping solutions.

### Bulk Solutions.

- Flexi Bags for 20 Ft Containers.
- 211 L Metals Drums.
- 220 L Plastic Drums.

### Commercial Solutions.

- 15/18/20/25 L Jerry Can.
- 14/15/16/17/18 Kg Metal Tins.
- 1/2/5//10 L PET Bottles.

# CORN OIL

## **Economic Oil.**

Corn oil provides excellent yields adding to the many fine qualities that corn oils have. Gaining popularity over other edible oils and carving out its own niche. With its high smoke point, it has become a viable oil for frying in the food industry. Rich in vitamin E and omega fatty acids it is also a common sight in many household kitchens.

But the main advantage of corn oil is it allows for the economically viable production of bio-diesel. And it is used in preference over other edible oils in animal feed. As well as a wide range of skincare products.

## **Quality.**

Ensuring this corn oil is available in ample quantity and quality. Bizz Trading works together with refineries to provide the best corn oil on the market. Available in both refined and crude.

Following ISO and GMP regulations in the refining process. Ensuring the quality, specifications and colour remain consistent. As well as being environmentally friendly.

Corn oil is an excellent oil to blend with other edible oils. So custom blends can be produced at the client's request.

## Corn Oil Specifications.

Free Fatty Acid	0.1% or less
Melting Point	-10 Celcius
Moisture & Impurities	0.5%
Cloud Points	5 ~ 10 Celcius
Iodine Value	107 - 135 Min
Colour(5-1/4)Lovibond Cell	Y 2.0, R 0.5 max

Saturated Fat	12.9%
MUFA's	27.6%
PUFA's	54.7%
Smoke Point	232 Celsius

Data in this table considered a range. Updated reports can be requested by client. Samples may also be requested if so desired by the client.

## Packaging & Shipping.

The excellent high quality corn oil can be packaged in a wide range of standard packaging solutions. Bizz Trading is also ready to provide a range of custom packaging solutions on request. As well as custom labelling and branding for the desired packaging. And can provide shipping solutions paired with the required paperwork.

### Bulk Solutions.

- Flexi Bags for 20 Ft Containers.
- 211 L Metals Drums.
- 220 L Plastic Drums.

### Commercial Solutions.

- 15/18/20/25 L Jerry Can.
- 14/15/16/17/18 Kg Metal Tins.
- 1/2/5//10 L PET Bottles.

# CANOLA OIL

---

## **A Buttery Smooth Oil.**

Canola oil is packed with healthy fatty acids with a low % of saturated fats. Paired with a sub-zero melting point making it an excellent oil for producing salad dressing and margarine. And even offers a high smoke point making it excellent frying oil.

Canola oil is also known as Rapeseed oil. The main distinction is that Rapeseed oil is not for human consumption but for industrial use. Grown from the same plant Canola oil is also a viable source of bio-diesel or as an industrial lubricant. And can even be used in animal feed or as fertilizer to grow crops.

## **Quality.**

Being able to provide both refined and crude canola. And doing so following ISO and GMP regulations producing sustainable canola oil for consumption and industrial applications.

Working together with refineries delivering premium quality canola oil for Bizz Trading clients. Ensuring the colour, quality and specification remain consistent.

And ofcourse canola oil is a excellent choice when creating a cooking oil blend. And Bizz Trading is able to provide this service as well with canola oil.

## Canola Oil Specifications.

Free Fatty Acid	0.3% max
Melting Point	-10 Celcius
Moisture & Impurities	0.5%
Cloud Points	-5 ~ -10 Celcius
Iodine Value	105 - 126 Min
Colour(5-1/4)Lovibond Cell	Y 5.0, R 1.0 max

Saturated Fat	7.4%
MUFA's	63.3%
PUFA's	28.1%
Smoke Point	204 Celsius

Data in this table considered a range. Updated reports can be requested by client. Samples may also be requested if so desired by the client.

## Packaging & Shipping.

As with the entire product line of edible oils. Canola oil can be delivered in a set of pre-set package solutions. But if so desired custom packaging is possible. As well as custom branding and labelling if so requested by the client. Bizz Trading is also able to handle the shipping and necessary documents for the client.

### Bulk Solutions.

- Flexi Bags for 20 Ft Containers.
- 211 L Metals Drums.
- 220 L Plastic Drums.

### Commercial Solutions.

- 15/18/20/25 L Jerry Can.
- 14/15/16/17/18 Kg Metal Tins.
- 1/2/5//10 L PET Bottles.

# SOYABEAN OIL

## Multifaceted Oil.

Soyabean oil has many beneficial properties. Of all the edible oils on the market soyabean oil has the most diversity. While being a excellent frying and cooking oil commonly used in the food industry due to a very high smoke point. Its low melting points also makes for a excellent ingredient in dressings and sauces. Packed with healthy vitamin E and K.

For industrial applications soyabean oil is commonly used in the production of plastics, adhesives, drying oil, bio-diesel skin care products to name but a few. Do to the amazing properties of soyabean oil.

## Quality.

Working with refineries that follow ISO and GMP regulations. Bizz Trading can supply a high grade soyabean oil. While ensuring sustainability practises are eco-friendly.

Resulting in a soyabean a supply of consistent quality and colour. While adhering to the specification set by the client.

Bizz Trading can also provide the blending service for soyabean oil. Since soyabean oil also lends itself perfectly to make cooking oil blends due to its excellent properties.

## Soya Bean Oil Specifications.

Free Fatty Acid	0.1% max
Melting Point	-16 Celcius
Moisture & Impurities	0.3%
Cloud Points	10 ~ 15 Celsius
Iodine Value	117 - 126 Min
Colour(5-1/4)Lovibond Cell	Y 3.0, R 0.8 max

Saturated Fat	8.99%
MUFA's	63.4%
PUFA's	20.7%
Smoke Point	238 Celsius

Data in this table considered a range. Updated reports can be requested by client. Samples may also be requested if so desired by the client.

## Packaging & Shipping.

Available for any client when it comes to soyabean oil is a set of standard packaging solutions. As well as the option for custom packaging. And custom labelling and branding if requested. Bizz Trading will also handle the shipping and documentation process for any client.

### Bulk Solutions.

- Flexi Bags for 20 Ft Containers.
- 211 L Metals Drums.
- 220 L Plastic Drums.

### Commercial Solutions.

- 15/18/20/25 L Jerry Can.
- 14/15/16/17/18 Kg Metal Tins.
- 1/2/5//10 L PET Bottles.
